Marlin and Glenfield guns are packed and shipped with an Owner's Manual which you should read before you load and fire the gun to assure safe and proper use. If you do not get one with your gun, write to us, giving the model number and we'll send you one. Write: Owner's Manual, Marlin Firearms Co., 100 Kenna Dr., No. Haven, CT 06473.

All great recipes have a crucial ingredient. In a Marlin lever action rifle, it's steel forgings.

Not that all the ingredients in a great recipe aren't important. They are.

But there's always that one very special ingredient that makes that recipe stand out above everything else.

With Marlin lever actions, it's the machined steel forgings that go into each one. And they really do make Marlin lever actions unique.

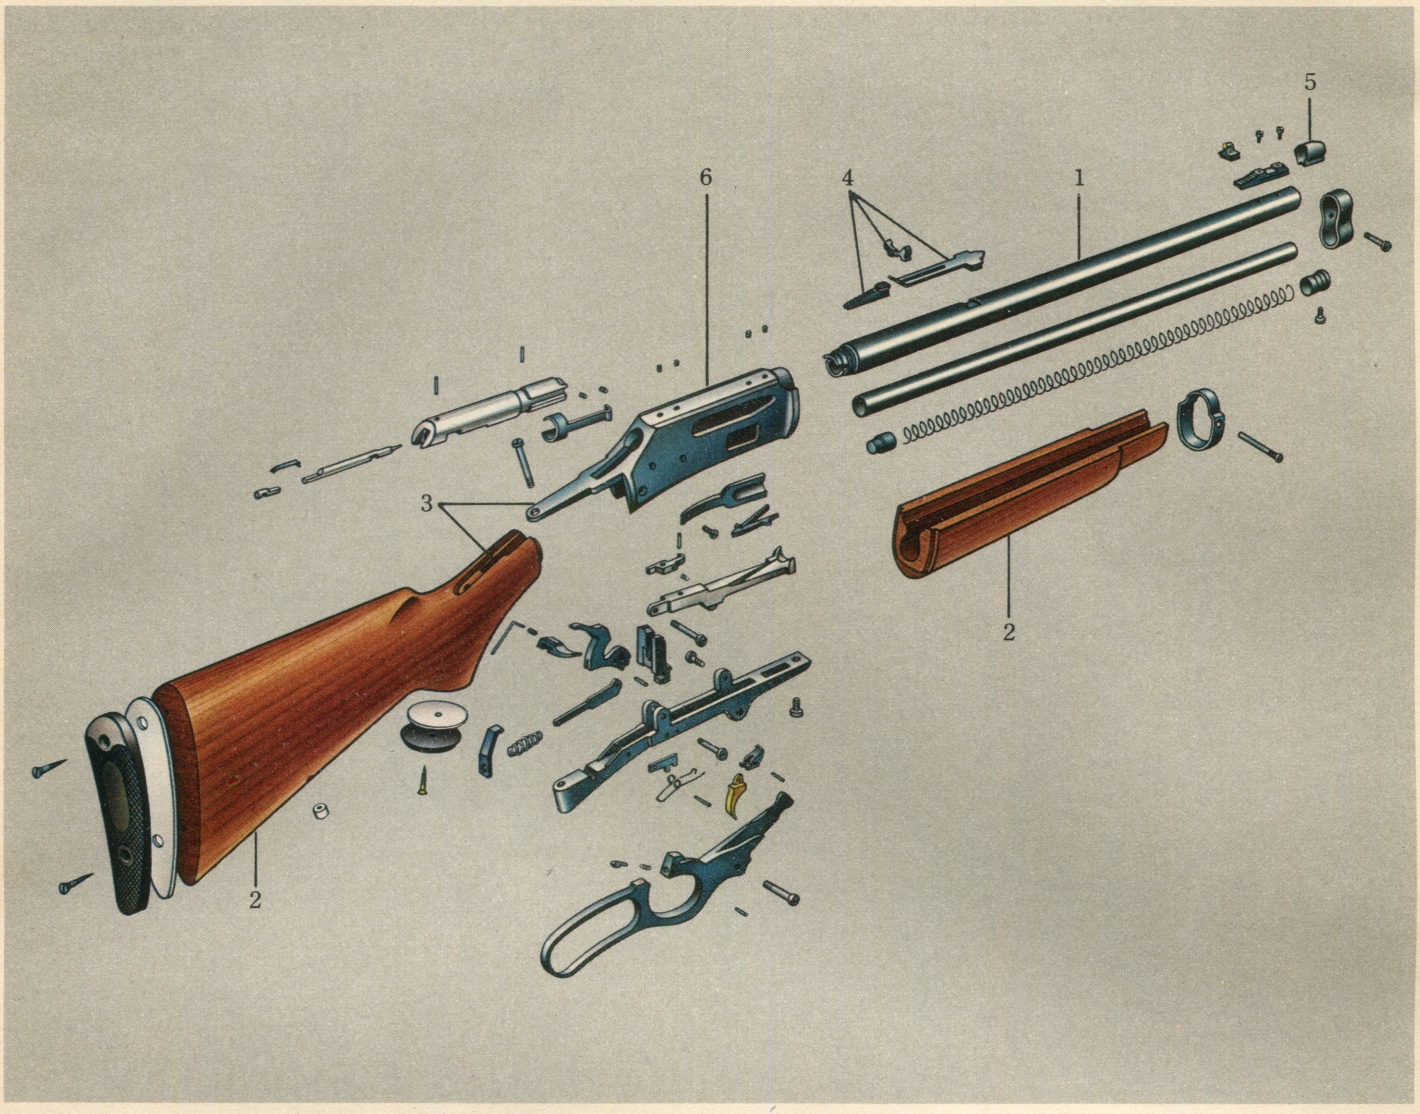
It all starts with solid, high quality steel bars.

All are heated to an extremely high temperature.

Next, the forging hammers go to work. Huge, powerful hammers that pound and rough shape the bars until the grain structure is actually altered to conform to the shape of the developing parts.

Each forged part is then precision-machined into its individual, final form. Then, as a last assurance of its utmost strength, the part is heat-treated.

The result is an action with unparalleled strength and durability.



Some other important ingredients in the Marlin recipe.

As crucial as machined steel forgings are in a Marlin lever action, there are other important features to consider: 1) Micro-Groove® barrel. A unique rifling pattern that provides a better gas seal, less bullet distortion, and improved accuracy. Only Marlin has it. 2) Genuine Walnut Stocks. All Marlin stocks are crafted from genuine American black walnut. 3) Mated Stocks and Receivers. Every Marlin lever action has its receiver and stock mated and matched, insuring dependable accuracy. 4) Sighting-in. All Marlin and Glenfield rifles are targeted on our modern indoor range. Closed circuit TV gives our shooters instant verification of their firing. 5) Wide-Scan® Removable Front Sight Hood. Another Marlin exclusive, this unique feature gives you the widest possible viewing area while fully protecting the front sight. 6) Solid Top, Side-Ejecting Receiver. Marlin's side ejection system gives you a solid scope mounting base. And even in deep woods, a scope can be invaluable. Especially in those states where antler identification is required.

Marlin and Glenfield guns are designed and manufactured to handle standard factory-loaded ammunition with dependability and safety.

Handloading has become increasingly popular over the years. We know that many Marlin owners find they can save money by using proper handloads. However, due to the many bullet and load options available, the element of judgment involved, and the skill required, Marlin does not make any recommendations with regard to loads or handloading.

The Guns:

Marlin Center Fire Lever Actions

With all the work it takes to bag a deer, don't blow it all on a dull, boring recipe. We suggest you try Crabapple Venison Roast. We think you'll find you've never tasted a venison dish quite like it.

Another thing we'd like to suggest is a way to improve your luck next time out. Take along a Marlin center fire lever action. Each and every one is tough, accurate and put together with precision craftsmanship.

The Recipe:

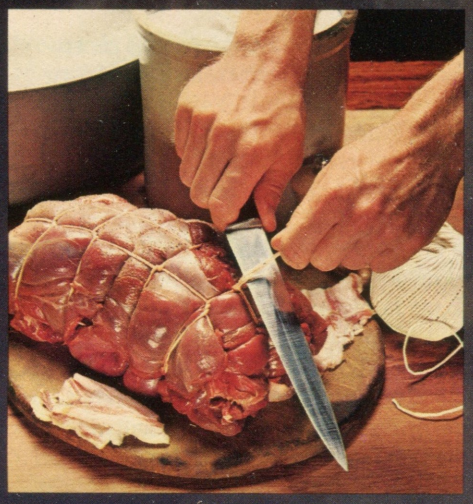
Crabapple Venison Roast

Ingredients:

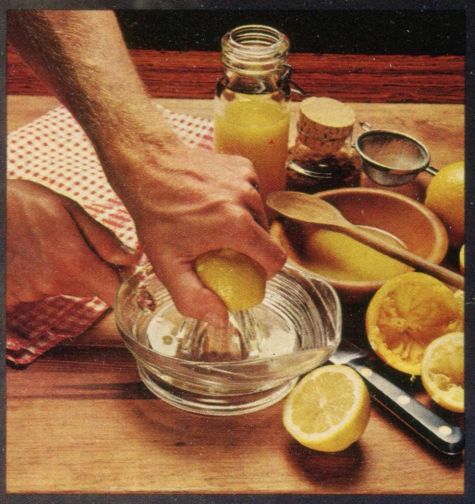
5-6 lb. leg of venison
½ to ¾ lb. salt pork
Salt
Fresh ground pepper
¼ cup orange juice
2 tbsp. lemon juice
¼ tsp. allspice

Glaze:

2 tbsp. butter melted
2 tbsp. orange juice
¼ cup crabapple jelly



Season roast with salt and pepper. Tie with cooking twine and cover with salt pork.



Sear meat in preheated 450° oven 15 minutes. Reduce heat to 350° and cook meat covered 15 minutes per pound. Baste frequently with a blend of juices and allspice.

30 minutes before roast is done, remove salt pork. Brush meat with glaze and continue roasting uncovered until done.

Marlin 336

Still America's premier deer rifle after more than 80 years. Since the introduction of the original Marlin Model 1893, more than 3 million have been made. This remarkable longevity is an impressive tribute to Marlin's continuing dedication to craftsmanship and quality in the manufacture of this great rifle. Many of the design features that made the Model 1893 a superior rifle are still a part of the modern 336. Its lever action is the second oldest being made today. Only the Marlin 39 22 caliber is older.

Today you can take your pick from three great models: the 336C with full pistol grip, the 336T western saddle gun, and the 336A, a rifle model with 24″ barrel and half magazine. All three feature side ejection, solid top receivers, machined, heat treated steel forgings, American black walnut stocks with Mar-Shield® finish, Micro-Groove® rifling, and patented folding semi-buckhorn rear sights.

All Marlin 336's are available in famous 30/30 caliber. The 30/30 is a world-wide favorite for deer and black bear hunting. Ammunition is modestly priced and available almost everywhere.

The Marlin 336C is also available in 35 Rem., a cartridge long preferred for hunting in heavy woods. Since most field shooting is done well within the effective ranges of these two cartridges, either is an excellent choice.

1. **We use six forged parts** in making our 336, 1894, 1895 and 444 rifles. The receiver, lever, trigger plate, carrier, hammer and locking bolt are all parts that demand nothing less than solid, machined, heat treated steel forgings.
2. **Carrier.** An almost hidden part, it raises the cartridge from the magazine into position for chambering. A critical part of the 336, 1894, 1895 and 444 lever actions, the carrier is a machined, heat treated steel forging.
3. **Solid Top, Side Ejecting Receiver.** The Marlin side ejection system is perfect for scope mounting. Even in deep woods, most deer hunters find a scope invaluable, especially in those states where antler identification is necessary.
4. **Wide-Scan® Removable Front Sight Hood.** This Marlin exclusive, standard on many models, affords the widest possible viewing area, while fully protecting the front sight. It's a real aid in framing moving game.

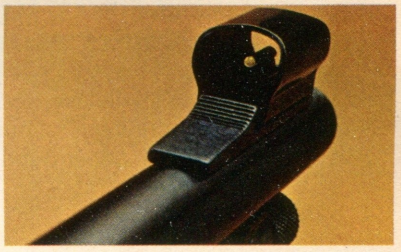
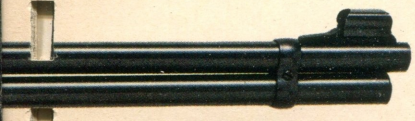
4.





Marlin 336C
The popular pistol grip carbine noted for its styling and dependability.

Marlin 336T
The traditional Western version of this great rifle. Known as the "Texan," the 336T is famous for its fine balance and fast handling qualities. Straight-grip styling makes the Texan an ideal saddle gun.

Marlin 336A
By popular demand we re-introduced this old favorite. It's made for hunters who prefer a longer barrel on their 336. Featuring sling swivels and leather carrying strap, the 336A is styled with a traditional half magazine.

Specifications

Model	336C	336T	336A
Caliber	30/30 Win. or 35 Rem.	30/30 Win. only	30/30 Win. only
Capacity	6-shot tubular magazine		5-shot tubular magazine

Approx. Weight	7 lbs.	6¾ lbs.	7 lbs.

New Marlin 1894 Carbine

357 Magnum

A fast-handling new version of our famous Model 1894. Its classic looks and superb balance are the result of a short 18½" barrel. And, like all Marlin center fires, the 1894 Carbine's action includes six solid steel forgings.
Ideal for small game and informal target shooting, the 1894 Carbine will make a perfect companion for the 357 Magnum handgun. The 1894 Carbine will handle all 357 Magnum factory loaded cartridges, except shot shells and wad cutters. It will also function with a number of 38 Special factory loaded rounds.*

Marlin 1894

44 Magnum

A direct descendant of the prized original Model 1894. Chambered for the potent 44 Rem. Magnum, this brush-buster delivers 10 repeat shots, and drives a 240-grain jacketed bullet with terrific knockdown power.

We use six heat treated forgings in the 1894's action. The receiver, carrier, lever, trigger plate, hammer and locking bolt are all machined from solid steel forgings.

With its straight grip, square bolt and squared finger lever, today's 1894 retains the traditional Western look of the famed old original.

1. **Quality Control.** Marlin uses a 50" Optical Comparator, an instrument widely used in the aerospace industry, to continually compare parts against blueprint specifications. Other comparators are located throughout the plant to maintain a constant check on all phases of production.
2. **Proof Firing.** Every Marlin and Glenfield is fired with an industry standard (proof) overload. Each high power rifle and shotgun is proof-fired in this heavy steel proof box. We do this so that when you see our name on a gun, you know it's a safe, dependable product.
3. **Genuine Walnut Stocks.** The stocks of all Marlin brand firearms are crafted from genuine American black walnut, individually fitted to their receivers.
4. **Sighting-in.** All Marlin and Glenfield rifles are targeted on our modern indoor range. Closed circuit TV gives our shooters an instant verification of their firing.

Marlin 1895 45/70 Repeater

Here's Marlin's re-creation of the original 1895 45/70 repeater. Adopted by the U.S. Army over 100 years ago, the 45/70 has always been classed as one of the finest heavy-cover cartridges ever developed for big game hunting. And there's plenty of reason for its return to popularity. Blasting through brush with minimum deflection, it delivers tremendous stopping power.

Marlin's new 1895 uses the basic Model 336 lever action system especially designed to feed and eject the larger 45/70 cartridge. Modern steels and machined, heat treated forgings give this time-proven action the strength to handle the big 45/70 cartridge.

The 1895 also features a honed chamber. Honing brings the chamber close to dimensional perfection.

In addition to readily available factory-loaded ammunition, a number of bullet and load options are available to the handloader.

Marlin 444 Sporter

For big game hunters who want smashing knockdown power combined with the fast, smooth Marlin lever action — it's the mighty Marlin 444. This big-bore stopper features a 22″ barrel that makes for quick handling even in heavy brush.

You can depend on Marlin's lightning-fast lever action to give you those rapid repeat shots often necessary when you're after the big ones.

The 444 caliber was developed expressly for lever action rifles. It's ideal for stopping big game.

This gun has all the qualities you expect in Marlin lever action rifles. Micro-Groove® rifling, American black walnut stock with tough Mar-Shield® finish, machined, heat treated steel forgings, solid top, side ejecting receiver, detachable sling swivels and a handsome leather carrying strap.

444 ammunition is available in Remington brand, featuring a 240-grain jacketed bullet. Handloaders may prefer the 265-grain Hornady brand bullet.

1. **The Mighty 45/70** (shown full size) produced by Federal, Remington and Winchester, is available at most sporting goods stores and gun shops.
2. **Detachable Swivels.** The 444, 1895 and SuperGoose 10 are equipped with a leather carrying strap and quick-detachable swivels, allowing you to remove the strap without tools, in a matter of seconds.
3. **444 Muzzle energy of 1½ tons.** Actual size photographs demonstrate the tremendous power of the Marlin 444. A 308 was also fired at this ⅜" cold-rolled steel plate at a distance of 30 yards.

The Guns:

Marlin 22 Rifles

Just about everybody's cooked up rabbit at one time or the other. But way down in the heart of the South, they've got a real special way of preparing this small but challenging game. A dish you just can't appreciate unless you've tried it.

Which pretty well sums up our feeling about all of our Marlin 22 rifles. They're quick, easy-to-handle, and super accurate. But don't take our word for it. Experience one for yourself. We think you'll agree. There's no 22 like a Marlin 22.

The Recipe:

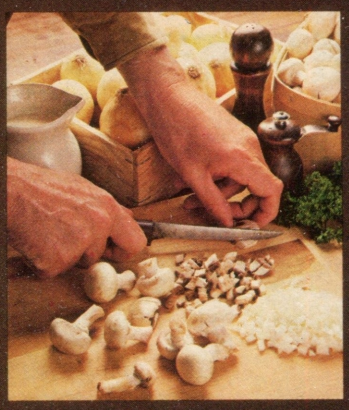
Southern Mustard Rabbit

Ingredients:

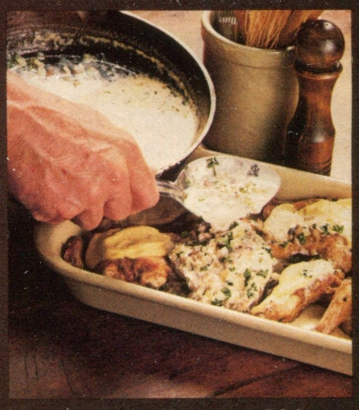
1 large, or 2 small rabbits
Flour
6 tbsp. butter
3 tbsp. olive oil
Mustard – Dijon or herbed
1 med. onion, finely chopped
½ cup chopped mushrooms
3 tbsp. chopped parsley
Salt
Fresh, ground pepper
1 cup heavy cream
Lemon juice (optional)

Clean and cut rabbits into serving size portions. Soak in salted water, 1-2 hours for young rabbit, overnight if older. Remove meat and pat dry. Dust with flour and sauté in heavy skillet in butter and oil until browned on both sides.

Remove and spread pieces liberally with mustard. Place in shallow baking dish.



Sauté onion in remaining fat several minutes. Add mushrooms and continue cooking. Add parsley, salt and pepper to taste. Blend in cream and heat through.



Pour mixture over rabbit. Bake in 350° oven 30-40 minutes or until tender. Taste sauce for salt. If desired, add a few drops of lemon juice. Serve immediately.

Marlin Golden 39

Any gun can become famous. This one has become a legend. Its design is so basic and clean it's been an all-time favorite for 85 years – that's the Marlin lever action 22. Fact is, it's the oldest shoulder gun still in regular production anywhere in the world!

There are other 22 lever guns on the market today – but the Golden 39 is still the "Cadillac of the 22's." Following are a few of the reasons why the 39 is in a class by itself! The Marlin 39's solid top receiver gives shooters the best of both worlds. Iron-sight shooters will find the 39 receiver clean, flat, and sandblasted to prevent glare. And it's drilled and tapped for a receiver sight. Scope shooters will appreciate the screw-on scope adapter base that provides a neat, versatile way to mount either a 22 or high power scope. The scope adapter base and solid top receiver provide a maximum of eye relief adjustment.

Marlin's patented Micro-Groove® rifling system consistently produces greater accuracy because the rifling grips the bullet securely, minimizing distortion, and providing a better gas seal.

1. **Patented magazine closure system** is spring-loaded to ensure solid locking, yet is easily released for loading. Featured on all tubular magazine 22's.
2. **Simple Take-down.** You can disassemble the Marlin 39 with only a coin. Simply loosen the take-down screw. The two-piece receiver separates to expose the working parts for easy cleaning.
3. **Solid Steel Forgings.** The heat treated breechbolt, hammer, trigger, lever and two-piece receiver are all carefully machined from steel forgings.
4. **New Scope Base.** This new base has double grooves, the upper one for ¾" and ⅞" 22 scope rings, the lower for 1" high power rings. (1" scope installation shown on 39A.) Base is supplied free with the 39A and 39M.
5. **The Mark of a Marlin.** This famous "bullseye" has been imbedded in the butt stock of every Marlin for more than 50 years. It's the symbol and trademark of quality to look for when you're buying a fine gun.

Marlin 22 Autoloaders

Marlin sells more 22 autoloaders than anyone else in the world. And for some excellent reasons: reliability, simple, fast actions, and Micro-Groove® accuracy. And these classically designed rifles feature American black walnut stocks with tough Mar-Shield® finish.

1. **Bolt Hold-open.** Standard on all Marlin and Glenfield autoloaders is this exclusive bolt hold-open device, providing added safety and ease of cleaning.
2. **Extra Clips** for your Marlin autoloader or bolt action are available through your dealer. Carrying a spare loaded clip lets you reload much faster.
3. **Exclusive Brass Inner Magazine Tube.** A small detail to be sure, but not if you've ever had a rusted steel tube. All Marlin and Glenfield tube loaders have this feature.
4. **Micro-Groove® Rifling.** An exclusive development, available on Marlin brand rifles, Micro-Groove® rifling produces barrels with superior accuracy. It results in less bullet distortion, a better gas seal, and better control. The number of lands and grooves varies with caliber.
5. **Exclusive Semi-buckhorn Folding Rear Sight.** All Marlin brand rifles feature this patented, adjustable folding rear sight.
6. **Wide-Scan™ Removable Front Sight Hood.** This Marlin exclusive, standard on many models, affords the widest possible viewing area, while fully protecting the front sight. It's a real aid in framing moving game.

Marlin Bolt Action 22's

These Marlin 22 bolt action rifles are the perfect choice for shooters of all ages. Whether you're after varmints or just a little informal, high-score target shooting, either gun gives you a lot of value for your shooting dollar. With their handsome, American black walnut Monte Carlo stocks and smooth, positive bolt action systems, both these 22's have all the heft and rugged good looks of more potent "big game" rifles.

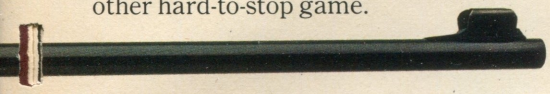
For the shooter who's looking for the fast action of a dependable repeater combined with the pinpoint accuracy of Micro-Groove® rifling, both models offer a degree of speed and smoothness not often found in a bolt action 22. Both will handle Shorts, Longs, and Long Rifles. Pistol grips and fore-ends are handsomely checkered. With all the 22 bolt actions around, we think these are two of the very best.

Marlin Bolt Action 22 Magnums

"Big game" styling shows in every detail of these great 22 Magnums. Their genuine American black walnut Monte Carlo stocks, equipped with sling swivels and handsome leather carrying straps, give them the heft and looks of "big game" rifles. Distinctive checkering on pistol grip and fore-end adds that custom touch. The caliber 22

Winchester Magnum Rim Fire is a larger, and more powerful cartridge than any other 22 rim fire. Not interchangeable with any other cartridge, it shoots a 40-grain copper jacketed hollow point or full metal jacketed bullet at nearly 2,000 feet per second (vs. 1,145 fps for standard 22 Long Rifle). Its greater power makes the 22 Magnum ideal for larger varmints and small game.

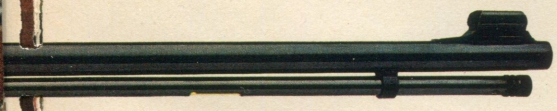
The extra power of the 22 Magnum coupled with the strong, smooth Marlin bolt action system make these rifles ideal for downing chucks, fox, and other hard-to-stop game.



Marlin 780 with convenient 7-shot clip magazine.

Marlin 781 with tubular magazine.

Marlin 782 Magnum with convenient 7-shot clip magazine.



Marlin 783 Magnum with 12-shot tubular magazine. The largest 22 Magnum capacity available.

Handsome checkering on the underside of all Marlin bolt action 22's enhances the beauty of their American black walnut stocks.

Leather Strap. A real plus at no extra cost, the carrying straps on our 22 Magnums will give the wear and durability only genuine cowhide can provide. In addition to ease of carrying, a strap can help steady your aim for better accuracy.

The Guns:

Marlin Shotguns

Okay, so maybe you've tried some pretty delicious duck recipes in your life. Well, here's one that's right up there with the best of them. Roast Apple Duck. And believe us, it is a taste sensation!

Almost as much of a sensation as our shotguns. Quite modestly, we believe they are among the finest shotguns being produced today. But is that really surprising? After all, we make our shotguns with just as much care now as we did back in 1898, when we built our first pump shotgun.

The Recipe:

Roast Apple Duck

Ingredients:

4-6 breasts of wild duck
Salt
Fresh, ground pepper
¾ cup heated red wine
3-4 apples, sliced thin
⅓ cup chopped walnuts
1 tsp. cinnamon
1 tsp. nutmeg
vinegar
¼ cup sugar
3 tbsp. olive oil

Gravy:

1 cup chicken broth
¼ cup minced scallions
1 large bay leaf
Fresh, ground pepper to taste
Pinch of nutmeg
Combine above and simmer, uncovered, about 10 minutes. Strain and serve with duck.

Cut squares of aluminum foil slightly larger than breasts. Place on rack in shallow roasting pan. For stuffing, mix apples, walnuts, cinnamon and nutmeg and divide on foil squares.

Rub both sides of duck with salt and pepper. Place, skin side up, on top of apple mixture and turn up edges of foil.

Make sauce with vinegar, ¼ cup sugar, and 3 tbsp. olive oil.

Brush duck with heated vinegar, sugar and olive oil. Roast in 425° oven for 25-30 minutes. Baste often.

Marlin Pump Shotguns

The Marlin 120 is fast becoming a top favorite of scattergunners everywhere. Anyone who shoulders the 120 and works its smooth action knows it is a superb shotgun.

Specifically designed to fill the need for a classic pump with Magnum capability, the 120 is what you'd expect a Marlin to be. No compromises. No shortcuts. No substitute materials. The rapidly growing popularity of the 120 is a tribute to Marlin craftsmanship.

Distinctive features: A receiver machined from a solid block of steel. An exclusive slide lock release that lets you open the action to remove unfired shells even with gloved hands. 120 barrels have honed chokes and burnished bores, and are designed to handle lead, or steel shot appropriate for shotgun shells. A handsome engine turned bolt, shell carrier and bolt slide. Double action bars provide the smoothest possible operation with no binding or twisting. Its matte finished receiver top eliminates glare, aids natural gun pointing and sighting. A big safety button, serrated and reversible for left-handers. It also features a stainless steel, non-jamming shell follower. It handles 2¾" Magnum, 3" Magnum and 2¾" Regular shells interchangeably. A genuine American black walnut stock and fore-end and a ventilated recoil pad. And, like all Marlin firearms, it's designed and made entirely in the U.S.A.

Specifications		
Model	**Deluxe 120 Magnum**	**Deluxe 120 Slug Gun**
Gauge	12 gauge; handles 2¾" Magnum, 3" Magnum or 2¾" Regular shells interchangeably.	
Choke	Full, Modified or Improved Cylinder (see facing page).	Improved Cylinder
Capacity	5-shot tubular magazine (4-shot with 3" shells); 3-shot plug furnished.	
Action	Pump; all-steel receiver; engine turned bolt, shell carrier and bolt slide; double action bars; exclusive, easy-to-use slide lock release; stainless steel shell follower; reversible cross-bolt safety; blued steel trigger; deeply blued metal surfaces.

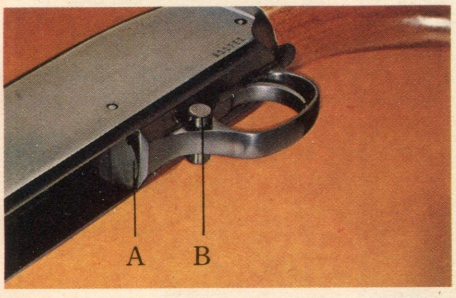
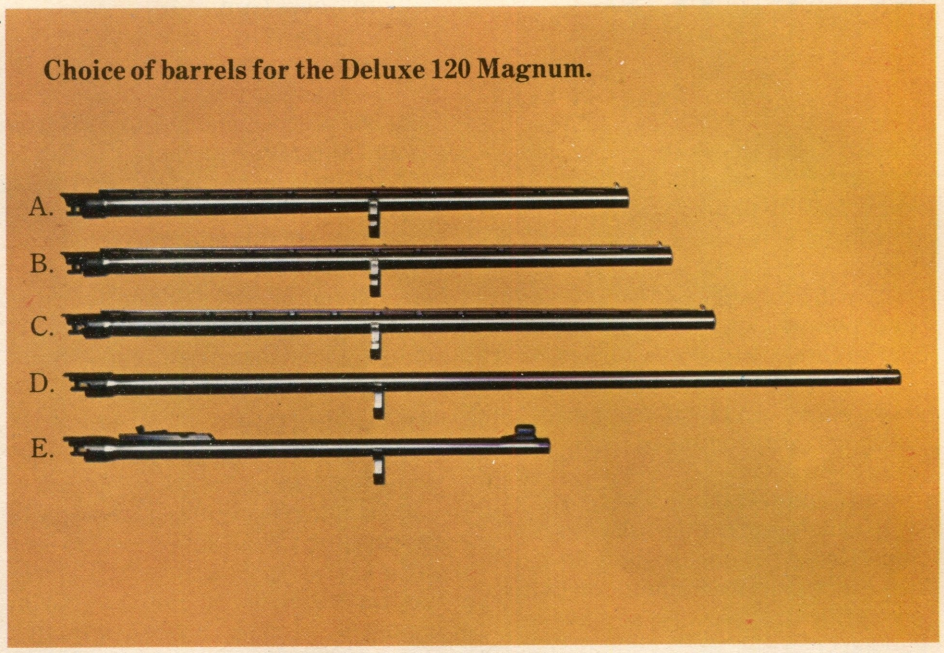
Overall Length	50½" (with 30" barrel).	40½"
Approx. Weight	8 lbs.	7¾ lbs.
Stock Dimens.	Length of pull 13⅞"; 1½" drop at comb; 2⅜" drop at heel.	

1.

2.

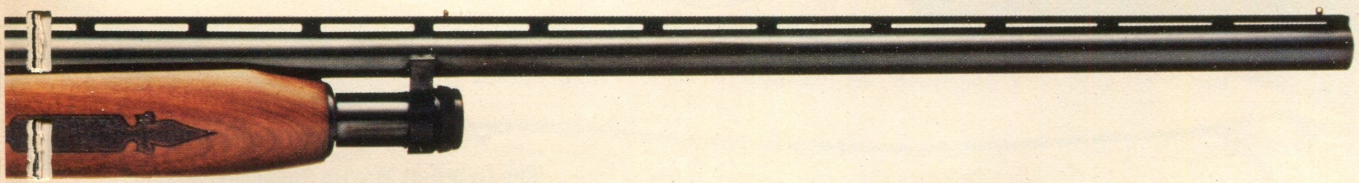


3.

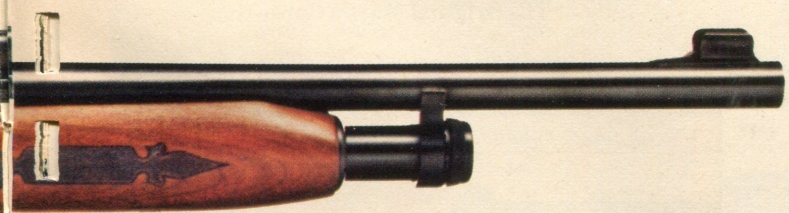


1. **The 120's receiver.** Machined from a solid block of steel for added strength.
2. **Unique slide lock release** (A) lets you remove unfired shells easily, even with gloves on. And the large cross-bolt safety (B) is located forward of the trigger.
3. **Choice of barrels for the Deluxe 120 Magnum.** They're completely interchangeable – in seconds – right in the field. For rifled slugs and buckshot, any choke may be used. However, best results are obtained with Improved Cylinder.

A. 26″ Improved Cylinder, with vent rib.
B. 28″ Modified Choke, with vent rib.
C. 30″ Full Choke, with vent rib.
D. 40″ MXR, Full Choke, without rib.
E. 20″ Slug Barrel (Improved Cylinder), with semi-buckhorn rear, ramp front sight with brass bead and Wide-Scan® hood. Drilled and tapped for scope mount.



Marlin Deluxe 120 Magnum



Marlin Deluxe 120 Slug Gun

Marlin Bolt Action Shotguns

Marlin SuperGoose 10
Until now, you had to pay a pretty penny for a 10-gauge repeater; but with the Marlin SuperGoose 10, all that has changed.

We call it SuperGoose because it's a more powerful version of the original Marlin Goose Gun.

It features a 34″ precision honed full choke barrel. And its 10½ pound heft and extra thick ventilated pad help absorb recoil.

And a comfortable leather carrying strap can extend the usefulness of the SuperGoose 10 to many shotgun activities. Since modern ammunition (with protective shot sleeve) is now available, shooters can take full advantage of the extra range and denser patterns of the 10-gauge Magnum. Although generally considered a waterfowl gun, SuperGoose 10 is also ideal for wild turkey hunters.

Marlin Goose Gun
This long-barreled specialist is designed for those tough shots at high-flying ducks and geese. With its extra-long 36″ precision honed full choke barrel and Magnum capability, the Marlin Goose Gun is just what you need to bag your limit of waterfowl. Other top quality features of this fine gun include: a barrel designed to handle lead, or steel shot appropriate for shotgun shells, a quick-loading 2-shot clip magazine, a ventilated recoil pad, and convenient leather carrying strap.

Marlin Slug Gun
The Model 55S is an excellent gun for going after deer in heavy cover with rifled slugs or buckshot. It incorporates the time-tested bolt action system used in the Goose Gun. Its short 20″ barrel has a precision honed, Improved Cylinder choke, which is recommended by ammunition manufacturers for best results with rifled slugs and buckshot. Adjustable semi-buckhorn folding rear, and ramp front sight with brass bead and Wide-Scan™ hood. Also drilled and tapped for scope mounting.

1. **Convenient 2-shot clip magazine.**
2. **Ventilated recoil pad.**
3. **SuperGoose 10** features top quality quick-detachable steel sling swivels. Other Marlin bolt action shotguns are equipped with standard steel swivels.
4. **SuperGoose 10** features an extra heavy deluxe cowhide carrying strap. Other Marlin bolt action shotguns are equipped with standard leather straps.
5. **SuperGoose 10,** in pattern tests conducted by Federal Cartridge Company with their Premium #2 shot, averaged about 90% in a 30″ circle at 40 yards.
6. **The Mighty 10-gauge Magnum.** Shown here actual size, the 3½″ shell is the most powerful legal migratory bird shotgun load in America. It fires two full ounces of #2 shot. Modern ammunition is available in Federal, Remington, and Winchester brands.

The Guns:

Glenfield Rifles and Shotguns

If you love pheasant, here's one recipe that'll make you love it even more. Roast Amber Apricot Pheasant has got to be one of the most unusual, and certainly one of the tastiest, pheasant recipes we've ever come across.

Which is a pretty good way to describe our Glenfield rifles and shotguns. You see, for the money, the quality and overall value of a Glenfield is very, very unusual. They're accurate, rugged, and extremely durable.

The Recipe:

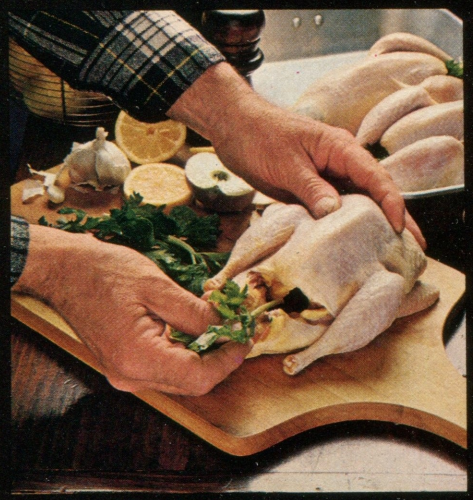
Roast Amber Apricot Pheasant

Ingredients:

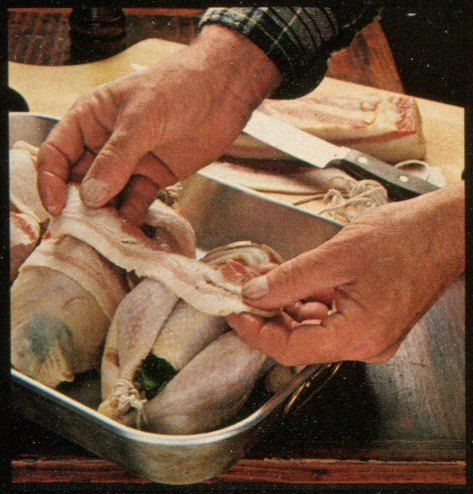
Two 2-3 lb. pheasants
Salt
Fresh, ground pepper
1 cup celery leaves
2 thick onion slices
2 lemon slices
2 small apples, halved
2 cloves garlic
6 bacon strips

Amber Apricot Sauce:

2 cups chicken broth
1½ cups apricot jam
1 rounded tsp. grated lemon or orange rind
Pheasant livers, chopped and uncooked
Salt
Fresh, ground pepper



Season pheasant inside and out with salt and pepper. Fill cavities with celery, lemon and onion slices, apple and garlic. Truss both birds. Place bacon slices over birds and roast uncovered 15-30 minutes, or until tender, in preheated 350° oven. Baste frequently with pan juices.



Remove bacon before birds are done, to evenly brown. Transfer pheasants to heated platter and keep warm. Pour off fat.

To make sauce, add chicken broth to pan and stir over medium heat, scraping up browned bits. Cook until half the liquid remains. Add apricot jam, lemon or orange rind, chopped liver, salt and pepper. Simmer over low heat 5 minutes. Spoon some sauce over birds. To thicken, add 1 tsp. cornstarch and 2 tsp. water.

Glenfield Guns

Top shooting performance at a truly economical price — you can count on it with Glenfield guns. Solidly built to stand up under the toughest service, these popular-priced guns are made to Marlin's strict standards of safety and dependability. Most Glenfield models feature unique stock checkering that gives a handsome customized look to these excellent sporting arms.

1. **We use six forged parts in making the Glenfield 30A and 30 GT.** The receiver, lever, trigger plate, carrier, hammer and locking bolt are all parts that demand nothing less than solid, machined, heat treated steel forgings.
2. **For scope use,** a free offset hammer spur is supplied with all Marlin and Glenfield lever action models. It works either right or left.

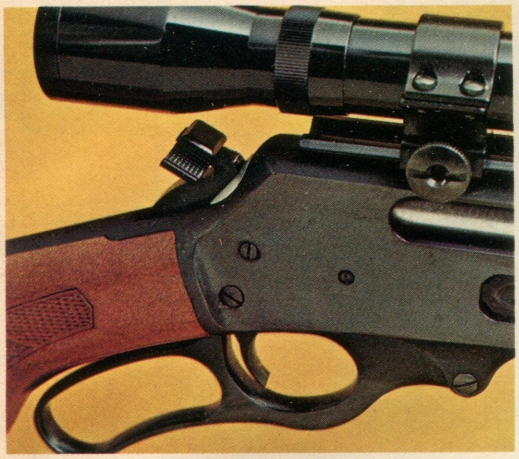
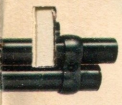
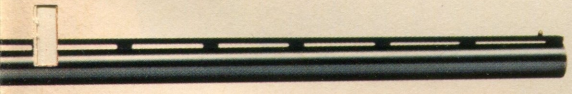
2.



New Glenfield 30GT
Fast-handling version of this proven 30/30, with new 18½" barrel. Classic straight grip styling with solid top, side ejecting receiver. Critical action parts are machined from forged steel.



Glenfield 30A
This great 30/30 rifle is one of the most popular deer guns ever made. Traditionally styled, the rugged lever action 30A features a solid top, side ejecting receiver for low, centered scope mounting. Critical action parts are machined from forged steel.



New Glenfield 778
The best value in a pump shotgun on the market. It features a machined steel receiver, double action bars, engine turned bolt, cross-bolt safety, and ventilated recoil pad.

Glenfield 50
A solid, workhorse gun built to take hard use. Features include a 2-shot clip magazine and ventilated recoil pad.

Glenfield 22 Rifles

New Glenfield 40
This sleek 18-shot autoloader has a classic, customized look, with scrollwork on both sides of the receiver, and a handsomely checkered 2-piece stock.

Glenfield 60
Clean, tasteful styling and old-fashioned craftsmanship show in every detail of this classy autoloader. It delivers fantastic performance – fires 18 Long Rifle cartridges as fast as you can pull the trigger.

Glenfield 70
A short-barreled, quick-pointing autoloader, featuring the convenience of clip loading.

Glenfield 20
A truly excellent, yet popular-priced bolt action 22. This slick 7-shot repeater is the perfect choice for small game, informal target shooting or just plain plinking. Its smooth, positive bolt action handles Short, Long or Long Rifle cartridges, which gives you real shooting versatility.

New Glenfield 15
A great gun for getting a beginning shooter off to a good start. Simple to use, the 15 takes only one 22 cartridge at a time. It also features an easy-load feed throat and positive thumb safety.

A classic frontier print, only $2.00

Frederic Remington has to be the single greatest frontier artist that ever lived. Now you can own a beautiful rendition of Remington's "Danger Ahead."

Originally commissioned for Marlin's 1900 catalog, this striking painting has been recreated in its every detail by John Scott, a noted contemporary artist.

Suitable for framing, this 20- x 30-inch print is yours for just $2.00. For your copy, send a check or money order to: Marlin Firearms Company, Dept. FR, North Haven, CT 06473.

Enter the Marlin Hunter Safety Essay Contest

At Marlin, we're proud of the work being done all over the country by Hunter Safety Instructors. And equally proud of the students they teach.

So, for the last few years, we've been offering these young people a chance to express their feelings about safety in hunting through the Marlin Hunter Safety Essay Contest.

This year's topic: "Is It Enough To Be A Safe Hunter?" To be eligible, students have to be currently enrolled in, or have successfully completed, a state hunter safety program.

State winners will receive $50 gift certificates for sporting equipment. Junior and senior national winners each receive $2,000 in United States savings bonds. Instructors receive a Marlin 22 rifle and a handsome "Hunter Safety Instructor of the Year" award. Entry materials available from: Marlin Firearms Co., Dept. HSC, North Haven, CT 06473.

SAFETY PLEDGED HUNTER
Marlin

Take the Marlin Safety Pledge

We're sure you would agree that the future of hunting and shooting in America ultimately depends on what all of us do to promote and practice safe and sportsmanlike habits.

That's why we invite you to take the Marlin Hunter Safety Pledge, as so many have already. Read it over.

I pledge *myself as a hunter to respect the environment which has made my sport possible.*

I pledge *my support of state and national conservation programs and all hunter safety courses.*

I pledge *to help protect my rights as an American to hunt and shoot by practicing the safe and proper use of firearms and obeying all game laws and safety rules.*

If you agree with what it says, send us a letter telling us you've taken the Pledge, along with 50¢ to help defray the costs of this strictly non-profit program.

In return, you'll receive a handsome embroidered shoulder patch, wallet card, bumper sticker, Safety Pledge Certificate, suitable for framing, and a special "Safety Minder" trigger guard insert.

Send to: Safety Pledge Program Director, Marlin Firearms Co., North Haven, CT 06473.

Take the Pledge right now, and practice it always. Not just for the sport's sake. But for your own.

Marlin®

Made now as they were then.
